

Unfinished, After Hours

Complete Project Documentation
Burnout & Stress Support Platform

Table of Contents

This document contains the complete technical and strategic documentation for the Unfinished, After Hours platform—a web-based burnout and stress support tool for students and workers.

Executive Summary

Project Overview

Unfinished, After Hours is a web-based platform designed to validate and support burnout as a natural human response, not a productivity problem. Unlike traditional wellness apps that promote hustle culture or toxic positivity, this platform provides adaptive, personalized support through CBT-informed conversations, micro-resets, and gentle tools.

Key Differentiators

- Adaptive color theming based on emotional state
- CBT-informed "Have a Conversation" feature that guides users through processing
- Validation-first messaging that treats burnout as systemic, not personal failure
- Tools designed specifically for low-energy users
- No streaks, no gamification, no productivity guilt

Target Audience

Students and workers experiencing burnout who are tired of being told to "optimize" or "push through." People seeking validation and practical support without judgment.

Major Changes & Updates

What Got Changed

- REMOVED: Anonymous Vent Space → REPLACED with Unsent Letters (private therapeutic writing)
- REMOVED: Mobile app development → Web-only focus (app as future add-on)
- COMPRESSED: 10-question quiz → 5 questions with fast-track option
- REDUCED: 6 core features at launch → 4 core features for MVP + 2 bonus features

What Got Added

-  "Have a Conversation" - CBT-informed chat session (PRIMARY DIFFERENTIATOR)
-  Unsent Letters - Private therapeutic writing space
-  Fast-track onboarding option for low-energy users
-  Expanded color palette (8 → 20 options)
-  Clearer free vs paid tier structure
-  Stronger copy guardrails and tone rules

What Got Refined

- Quiz flow (shorter, more focused)
- Monetization messaging (clearer value proposition)
- Feature prioritization (realistic MVP scope)
- Homepage layout (tighter, more effective)

Site Architecture

Complete Site Map

Homepage

- Hero Section (above fold)
- The Problem (context)
- How It Works (3 steps)
- What People Say (testimonials)
- Footer CTA

Entry Flow (Onboarding)

- Choice: Quick Reset | Have a Conversation | Take the Quiz
- Fast-track option: "I just need to breathe"
- Full experience: 5-question quiz → Burnout Profile

Dashboard (User Home)

- What do you need today? (Quick Start)
- Soft To-Do List widget
- Today's Reset (featured)
- Quick Journal Prompt
- Past Conversations (NEW)

Core Features (Main Navigation)

- Have a Conversation (NEW - primary differentiator)
- Resets (2-5 minute exercises)
- Soft To-Do List
- Journal Space
- Unsent Letters (NEW)

Secondary Pages

- Resources Library (Phase 2)
- Conversation History
- Account Settings
- Upgrade to Unfinished, After Hours+
- About / Why This Exists

The Onboarding Quiz

Quiz Structure (5 Questions, 90 Seconds)

The quiz has been compressed from 10 questions to 5, with a fast-track option for users who need immediate relief.

Entry Choice

Before you start, what do you need right now?

- [Button 1] I just need to breathe. → Quick reset (skips quiz)
- [Button 2] I want to talk this through. → Have a Conversation (skips quiz)
- [Button 3] I want to understand what's happening. → Take the quiz

Question 1: Behavior Check

When you sit down to work or study, what happens first?

- I start, but my energy disappears fast
- I overwork to avoid feeling behind
- I procrastinate and feel guilty about it
- I feel numb and stare at the screen

Purpose: Feeds into burnout profile identification

Question 2: Guilt Check

If you finish only one task in a day, you feel:

- Relieved, but uneasy
- Like the day was wasted
- Anxious about tomorrow
- Neutral—nothing really registers

Purpose: Determines prominence of "Enough for Today" button

Question 3: Pressure Source

Which feels heavier right now?

- The work itself
- The pressure around the work
- Other people's expectations
- My own expectations

Purpose: Tags which resources to show first; informs journaling prompts

Question 4: Color Preferences (EXPANDED)

Pick up to THREE colors you're drawn to right now:

Expanded from 8 to 20 colors for better personalization:

Neutrals:

Soft beige, warm cream, cool gray, charcoal, off-white

Cool tones:

Muted blue, sage green, dusty teal, pale lavender, soft gray-blue

Warm tones:

Warm brown, terracotta, dusty rose, burnt orange, amber

Deep tones:

Deep green, navy, plum, olive, burgundy

Then: Pick ONE color that feels overwhelming or wrong

Purpose: Generates a personalized theme; avoids triggering color entirely

Question 5: Intent

What do you want most from this space today?

- To feel less alone
- To get unstuck
- To rest without guilt
- To quietly let things out

Purpose: Determines which feature to highlight first on dashboard

Burnout Profiles (Quiz Results)

Each profile provides validation and a gentle focus:

The Over-Functioner

You keep going because stopping feels unsafe. Focus: releasing pressure without losing control.

The Spiral Planner

You care deeply—but the planning has turned against you. Focus: redefining "enough."

The Quiet Quitter

You're still showing up, but something inside has stepped back. Focus: reconnection, not motivation.

The Numb Drifter

You're not failing—you're overloaded. Focus: gentle re-entry into yourself.

Shareable Burnout Profile Cards

Purpose

Turn quiz results into visually appealing, shareable cards that users can post on social media. This creates organic word-of-mouth growth and positions the platform as something worth talking about.

Why This Matters

People LOVE posting personality-style results. This is how apps grow organically.

- Users feel seen by their result → want to share it
- Friends see the card → curious about their own burnout type
- Shareable = free marketing
- Validates the experience publicly (reduces stigma)

The Four Shareable Cards

Card 1: The Over-Functioner

Visual card design:

Your Burnout Type:

The Over-Functioner

You keep going

because stopping feels unsafe.

[Unfinished, After Hours logo]

Card 2: The Spiral Planner

Visual card design:

Your Burnout Type:

The Spiral Planner

*You care deeply—
but the planning has turned
against you.*

[Unfinished, After Hours logo]

Card 3: The Quiet Quitter

Visual card design:

Your Burnout Type:

The Quiet Quitter

*You're still showing up,
but something inside
has stepped back.*

[Unfinished, After Hours logo]

Card 4: The Numb Drifter

Visual card design:

Your Burnout Type:

The Numb Drifter

*You're not failing—
you're overloaded.*

[Unfinished, After Hours logo]

Design Specifications

Visual Style:

- Square format (1080x1080px for Instagram, 1200x1200px for better quality)
- Background: User's chosen color from quiz (personalized)
- Text: Clean serif font (matches brand)
- Minimalist design - plenty of white space
- Subtle texture or grain (matches site aesthetic)

Text Hierarchy:

- Small text: "Your Burnout Type:"
- Large text: Profile name (The Over-Functioner, etc.)
- Medium text: 2-3 line description
- Small logo/watermark: "Unfinished, After Hours" at bottom

Color Variations:

- Each card uses the user's personalized theme from quiz
- Background = their primary chosen color (lightened)
- Text = high contrast for readability
- Result: Every card looks slightly different (more personal, more shareable)

User Flow

1. User completes onboarding quiz
2. Sees their burnout profile result page
3. Below result: "Share Your Result" button
4. Click → Generates personalized card with their color theme
5. Options appear:
 - *Download image*
 - *Share to Instagram Stories*
 - *Share to Twitter*
 - *Copy link (with preview card)*
6. User posts → Friends see → Traffic to site

Share Options Interface

After quiz result:

[Preview of their card]

Share your result:

[Download Image] [Instagram] [Twitter]

or copy link: unfinishedafter.com/type/overfunctioner

Technical Implementation

Card Generation:

- Use HTML Canvas or server-side image generation
- Dynamic text placement based on profile name length
- Apply user's color theme from quiz

- Export as PNG (high quality)

Shareable Links:

- Each profile type gets a landing page: /type/overfunctioner
- Landing page shows card + "Take the quiz to find your type"
- Open Graph meta tags for social media preview
- Tracks referral source (Instagram, Twitter, etc.)

Why This Drives Growth

Psychology of Sharing:

- Identity validation: "This is me" → shareworthy
- No shame: Burnout profiles aren't diagnoses, they're relatable
- Conversation starter: Opens dialogue about burnout
- FOMO: Friends see it → "What's mine?"

Viral Mechanics:

- Every share = free marketing
- Visual cards perform better than text-only posts
- Personalized colors make each card unique
- Low friction: One-click sharing

Comparable Success Examples:

- 16 Personalities (MBTI tests): Millions of shares
- Spotify Wrapped: Annual viral moment
- Wordle: Share-friendly results grid
- Common thread: Results that feel personal + easy to share

Messaging & Copy

On result page (before share button):

"Your friends might recognize themselves in one of these too."

Share prompt (subtle, not pushy):

"Share if this resonates."

Pre-filled social captions (optional):

Twitter: "Took the Unfinished, After Hours burnout quiz. I'm a [Profile Name]. What are you? unfinishedafter.com"

Instagram: "Called out. 🙄 #burnout #mentalhealth"

Privacy & Control

- Sharing is always optional
- No automatic posting
- User downloads/shares manually
- No personal data in card (just profile type)

Tracking & Metrics

Track to measure impact:

- How many users generate share cards
- How many actually share (download count as proxy)
- Traffic from social media to landing pages
- Conversion rate: social visitor → quiz completion
- Which profile types get shared most

Future Enhancements (Phase 2)

- Animated cards (subtle motion for Stories)
- Multiple card templates (user can pick style)
- Add personal message to card ("This is me because...")
- Compare types: "I'm X, my friend is Y" dual cards

Why This Fits Unfinished, After Hours

This feature aligns perfectly with the brand:

- Anti-shame: Burnout profiles normalize the experience

- Validation-first: Results validate, don't pathologize
- Honest tone: Descriptions are blunt but kind
- Aesthetic: Minimalist cards match site design
- Low pressure: Optional sharing, no forced virality

Bottom line: This turns every user into a potential advocate.

NEW FEATURE: Have a Conversation

What It Is

A guided, therapeutic chat session that helps users unpack feelings through CBT-informed questioning. Not rigid therapy, not a chatbot that pretends to be human—something in between.

Core Concept

- Reflective, not directive: Asks questions rather than giving answers
- Paced by the user: They can go deep or stay surface-level
- Organically adaptive: Suggests tools mid-conversation when relevant
- No pressure to "finish": Can end anytime, resume later

How It's Different

NOT a generic chatbot → BUT a CBT-informed guide

NOT therapy replacement → BUT a thought-unpacking tool

NOT crisis intervention → BUT reflective processing

NOT AI that acts human → BUT AI that's transparently helpful

Session Structure (Flexible Framework)

7. Opening (Establish safety + intent)
8. Exploration (CBT-style inquiry)
9. Pattern Recognition (Gentle mirroring)
10. Organic Tool Suggestions (If relevant)
11. Closing (Soft landing, no forced resolution)

Sample Conversation Flow

Opening:

AI: "Hi. You wanted to talk this through. There's no agenda here—just space to think out loud. What's sitting heavy right now?"

User: "I don't even know. I just feel... stuck. Like I'm doing everything I'm supposed to but nothing feels good."

Exploration (CBT Layer 1):

AI: "That 'supposed to' feeling—let's sit with that for a second. What does 'supposed to' look like for you right now?"

User: "I guess... finishing assignments on time, going to the gym, keeping up with people. The normal stuff."

Pattern Recognition:

AI: "It sounds like you've been waiting for rest to fix it—but rest hasn't changed the emptiness. Does that feel accurate?"

User: "Yeah. That's exactly it."

Organic Tool Suggestion:

AI: "Can I suggest something? There's a short reset called 'You Don't Need to Earn Rest.' It's 3 minutes, and it's designed for this exact feeling. Want to try it now, or keep talking?"

User: "Maybe after. I want to keep going."

CBT Framework Phases

Phase 1: Identify Thoughts

- "What does [their phrase] mean to you?"
- "When did that start feeling true?"

Phase 2: Connect Thoughts → Feelings

- "When [situation], what do you feel?"
- "How does [thought] land in your body?"

Phase 3: Recognize Patterns

- "I'm noticing [pattern]. Does that track?"
- "Here's what I'm hearing: [summary]. Does that fit?"

Phase 4: Explore Alternatives (Gently)

- "If [limiting belief] weren't true, what would change?"
- "What would [goal] actually look like for you?"

Phase 5: Offer Tools (Contextually)

- "There's a [reset/prompt/resource] for this. Want to try it?"
- "I'm going to save [tool] for you. You can use it whenever."

Organic Routing Logic

When user mentions guilt about rest → Suggest Reset: "You Don't Need to Earn Rest"

When user mentions feeling numb → Suggest Journal prompt: "What needs to feel lighter?"

When user mentions overwhelm → Suggest Soft To-Do: "Let's break this into small steps"

When user can't talk to someone → Suggest Unsent Letters

When user mentions comparing to others → Suggest Resource: "Productivity Guilt Survival Kit"

Safety & Boundaries

Crisis Detection Protocol:

If user mentions self-harm, suicidal ideation, or severe crisis:

- AI provides crisis resources (988 Lifeline, Crisis Text Line)

****Veterans Crisis Line:** Call or text 988, then press 1 | Text 838255**

- Conversation pauses (can resume later)
- Dashboard shows resource card
- No judgment, no lecturing

What the AI Does NOT Do:

- Diagnose mental health conditions
- Give medical advice
- Replace therapy
- Act like it has emotions
- Make promises ("You'll feel better soon")
- Force solutions

Core Features (Phase 1 MVP)

1. Burnout Check-In Quiz

- 5 questions, 90 seconds
- Fast-track option for low-energy users
- Burnout profile result with validation
- Adaptive theme generation based on color preferences

2. Have a Conversation (PRIMARY DIFFERENTIATOR)

- CBT-informed guided chat session
- User-paced exploration
- Organic tool routing mid-conversation
- Conversation history and export (paid feature)
- Crisis detection and safety protocols

3. 2-5 Minute Resets

- 10-15 curated resets at launch
- Categories: Body resets (stretches, movement, breath), Mind resets, Guilt disruptors
- Examples: "Unclench Your Jaw," "5-Minute Movement Break," "Stare at Something Green," "You Don't Need to Optimize This Moment"
- "5-Minute Movement Break" - Simple stretches or walk
- No timer guilt (can exit anytime)
- Optional audio versions

4. Soft To-Do List

- Two columns: "Must do" vs "Could do"
- "Enough for Today" button (marks one task as sufficient)
- Archive without shame: "Not today, and that's okay"
- No streaks, no metrics
- Microcopy: "Progress counts, even if it's quiet."

5. Journal Space

- 20 rotating prompts at launch
- Examples: "What am I avoiding?", "What would 'done enough' look like?", "What am I tired of explaining?"
- Private entries (no algorithms, no sharing)
- Save/export as PDF (paid feature)
- Free users: 1 prompt per day

6. Unsent Letters (NEW)

- Private writing space for letters you'll never send
- 8 pre-set recipients: My burnout, My inner critic, Someone I can't talk to, My future self, etc.
- Save as draft / vault / delete options

- Export as PDF (paid feature)
- Fully private, zero moderation needed
- Replaces anonymous vent space (lower operational burden)

Monetization Strategy

Three-Part Revenue Model

1. Unfinished, After Hours+ Membership (Core Revenue)

Price: \$5/month or \$45/year

Positioning: "If this space helps, you can keep it."

Free Tier (Always Available):

- Full access to quiz + burnout profile
- Adaptive theme (3 pre-set color combinations)
- 3 conversations per month (15 min each)
- 3 resets per day
- Basic soft to-do (5 tasks/day)
- 1 journal prompt per day
- Unlimited unsent letters (no export)

Unfinished, After Hours+ Unlocks:

- Unlimited conversations + full history
- Export transcripts & journal entries as PDF
- Unlimited resets + full audio library
- Advanced soft to-do (unlimited tasks, "Enough for Today" unlocked)
- Full journaling vault (all prompts, unlimited entries)
- All theme packs included (10+ color combinations)
- Mood & energy tracking (optional, no streaks)
- Early access to new features

2. One-Time Digital Toolkits

Price: \$7-12 each | \$20 for bundle of 3

Available to both free and paid users

Phase 1 Toolkits:

- Productivity Guilt Survival Kit (\$7)
- Deadline Season Mode (\$10)
- The Burnout Plateau (\$12)

Each includes:

- 5-7 guided exercises
- 10 curated prompts
- Soft reset plan (not a challenge)
- Integrates into platform OR downloads as standalone PDF

3. Theme + Audio Packs (Emotional Add-Ons)

Theme Packs: \$3-5

- Examples: Midnight Static, Soft Neutral, Dark Academia Burnout

Audio Packs: \$4-6

- Examples: "Enough for Today," "Stop Optimizing Your Rest," "Quiet Mornings"

Why it works: Users buy them because they feel seen, not sold to.

What We're NOT Doing

- No ads
- No data selling
- No "premium guilt" features
- No push notifications
- No shame-based upsells

Unfinished, After Hours stays a refuge, not a funnel.

Design & Copy Guidelines

Visual Direction

- Soft neutrals + adaptive accent colors (from quiz)
- Serif + clean sans-serif pairing
- Plenty of white space
- Subtle grain / paper texture
- Dark mode encouraged
- Generous margins, nothing crowded
- Low-pressure interactions (buttons say "If you want" not "Start now")

Color System

20 color options across 4 categories:

- Neutrals (5): Soft beige, warm cream, cool gray, charcoal, off-white
- Cool tones (5): Muted blue, sage green, dusty teal, pale lavender, soft gray-blue
- Warm tones (5): Warm brown, terracotta, dusty rose, burnt orange, amber
- Deep tones (5): Deep green, navy, plum, olive, burgundy

Theme Generation:

- Background: Primary (lightest chosen color)
- Accent 1: Buttons, links (most-chosen color)
- Accent 2: Highlights, borders (second-choice color)
- Text: Auto-adjusts for contrast
- Avoided color: Never appears anywhere

Copy Rules

NEVER Use:

- "Just" (trivializes)
- "Should" (creates pressure)
- "You've got this" (empty motivation)
- "Self-care" (overused)
- "Wellness journey" (corporate speak)
- "Optimize" (productivity culture)
- "Crush your goals" (hustle culture)

ALWAYS Do:

- Name the feeling first
- Validate before suggesting
- Use short sentences when energy is low
- Offer choice, never prescription
- Be honest without harshness
- Be poetic but clear

Microcopy Examples

Task complete button: "Done for now" (not "Mark complete")

Journal prompt: "You don't have to make sense" (not "Express yourself")

Reset audio: "Nothing to fix. Just pause." (not "Find your center")

Archive task: "Not today, and that's okay" (not "Delete task")

Upgrade prompt: "If this space helps, you can keep it" (not "Unlock premium!")

Empty to-do: "Start small, or don't start at all" (not "Add your first task!")

Homepage Layout (Detailed)

Section 1: Hero (Above Fold)

Headline (Large):

"You're not lazy. You're exhausted."

Subhead:

"Unfinished, After Hours helps you untangle burnout without turning rest into another task."

Primary CTA:

[Button] Take the 90-second check-in

Secondary Link:

or browse without signing up

Microcopy at bottom:

No yelling. No hustle slogans. Just truth.

Section 2: The Problem

Headline:

"Most burnout tools treat you like a productivity problem. This one treats you like a person."

Three columns:

Column 1 - Other tools say:

- "Optimize your morning routine"
- "Build better habits"
- "You've got this!"

Column 2: →

Column 3 - We say:

- You're not broken
- You're overloaded
- And that's not your fault

Section 3: How It Works

Headline:

"Three steps. No pressure."

12. Take a 90-second check-in - Get your burnout profile (not a diagnosis—just clarity)
13. Use tools that adapt to you - Resets, journaling, soft to-dos, unsent letters
14. Rest without turning it into another task - No streaks. No shame. No "productivity hacks."

Section 4: What People Say

Three testimonial cards:

"I didn't realize how much I needed permission to stop." — college student

"It's the only app that doesn't make me feel worse." — designer

"Finally, something that doesn't treat burnout like laziness." — teacher

Section 5: Footer CTA

Headline:

"Try it. No account required."

[Button] Start the check-in

Fine print: Always free. Upgrade only if it helps.

Technical Implementation

Technology Stack

- Frontend: HTML5, CSS3, Vanilla JavaScript
- Hosting: Vercel (free tier)
- Domain: unfinishedafter.com (Namecheap)
- Typography: Cormorant Garamond (serif) + DM Sans (sans-serif)
- Platform: Web-only (mobile app as future add-on)

Development Phases

Phase 1: MVP Launch (Current)

- Burnout check-in quiz
- Have a Conversation feature
- 2-5 minute resets
- Soft to-do list
- Journal space
- Unsent letters

Phase 2: Post-Launch (3-6 months)

- Resources library
- Audio library expansion
- Additional toolkits
- Theme customization expansion

For Class Presentation

Minimum Viable Prototype:

15. Figma mockups (high-fidelity): Homepage, quiz flow, dashboard, one feature in detail
16. Working quiz (Google Forms or Typeform styled to match brand)
17. One interactive feature (coded or clickable prototype)

Key Points to Present:

- Problem: Burnout tools either infantilize or gamify stress
- Solution: Validation-first platform that adapts to user, not vice versa
- Innovation: Adaptive theming + CBT-informed conversation + tools for low-energy users
- Demo: Walk through quiz → dashboard → conversation feature

Why This Works

Market Gap

Most burnout platforms either:

- Infantilize users with cutesy wellness language
- Turn stress into a productivity hack
- Offer generic meditation without context
- Gamify recovery with streaks and badges

This platform does neither. It treats burnout like a human response, not a personal failure.

Core Differentiators

18. Validation without pathologizing
19. Adaptive personalization (color, tone, features)
20. CBT-informed conversation as connective tissue
21. Tools designed for low-energy users
22. Anti-hustle positioning
23. No metrics, no streaks, no guilt

User Journey Example

24. User enters site → chooses "I want to talk this through"
25. Has 10-min conversation about productivity guilt
26. AI suggests: Reset ("You Don't Need to Earn Rest") + Journal Prompt
27. User tries reset, saves journal prompt for later
28. Next day: returns to dashboard, sees saved prompt
29. Starts journaling, gets stuck
30. Site suggests: "Want to talk this through?"
31. Resumes conversation (AI remembers previous themes)

Key Insight: Conversation becomes the connective tissue between isolated tools.

Appendix

Feature Comparison Table

Old vs New Version:

Quiz: 10 questions → 5 questions + fast-track

Vent Space: Anonymous community → Unsent Letters (private)

Launch features: 6 → 4 core + 2 bonus

Color options: 8 → 20

Platform: Web + app → Web-only (app later)

Monetization: 3 streams (refined messaging)

Next Steps

32. Create Figma mockups for class presentation

33. Build working quiz prototype

34. Develop one interactive feature demo

35. Write sample conversation scripts

36. Design adaptive theme system

37. Plan Phase 2 feature rollout

Key Principles

- Validate, don't pathologize
- Adapt to user, not vice versa
- Low-energy design throughout
- Honest without harsh
- Refuge, not funnel
- Permission to be unfinished

Authentication & Dual Quiz System

Overview

The platform uses a smart authentication system with two distinct quiz types: an in-depth Onboarding Quiz for new users that establishes their baseline, and a quick Check-In Quiz for returning members that adapts recommendations without requiring a full reassessment.

Sign In/Out Structure

Landing on Homepage (Not Signed In)

- Browse site (read-only)
- Can see homepage, sample resets, about page
- Cannot access tools or conversation features
- Clear "Sign In" button in top navigation

Sign In Options

Sign in with:

- Email + password
- Google
- Apple

No account? Sign up link clearly visible

Sign Up Flow

Step 1: Create account

- Email + password OR social login
- Name (optional - can use "Friend" as default)

Step 2: Onboarding Quiz (required)

- 5 questions, 90 seconds
- Creates burnout profile + adaptive theme

Step 3: Dashboard

- "Your space is ready"
- Featured tool based on quiz intent

Updated Entry Flow

The entry experience differs based on authentication status:

New Users (First Visit):

38. Land on homepage
39. Click "Sign up - it's free"

- 40. Create account
- 41. Take Onboarding Quiz (required, 5 questions)
- 42. Arrive at personalized dashboard

Returning Users:

- 43. Click "Sign In"
- 44. Authenticate
- 45. Redirected to dashboard immediately
- 46. Optional: Take Check-In Quiz anytime

The Dual Quiz System

1. Onboarding Quiz (New Users Only)

When: First time signing up

Purpose: Establish baseline, create profile, set theme

Length: 5 questions, 90 seconds

Cannot skip: This is required for account setup

What It Creates:

- Burnout Profile (Over-Functioner, Spiral Planner, Quiet Quitter, or Numb Drifter)
- Adaptive color theme (personalized based on selections)
- Initial feature recommendations
- Baseline emotional state

Questions (Same 5 from Original Quiz):

47. Behavior Check - "When you sit down to work or study, what happens first?"

48. Guilt Check - "If you finish only one task in a day, you feel:"

49. Pressure Source - "Which feels heavier right now?"

50. Color Preferences - Pick up to 3 colors, mark 1 to avoid (20 options)

51. Intent - "What do you want most from this space today?"

Result Page Shows:

Your Profile: [Profile Name]

[Profile description]

Right now, your focus is: [gentle focus statement]

Your space is ready. [Go to your dashboard]

2. Check-In Quiz (Returning Members)

When: Anytime user wants to reassess

Purpose: Track how they're doing, adjust recommendations

Length: 3 questions, 60 seconds

Optional: Users choose when to take it

Appears on Dashboard As:

How are you doing today?

[Take a 60-second check-in]

Last check-in: [X days ago]

The 3 Questions:

Question 1: Current State

"How are you feeling today compared to when you started?"

- Lighter
- About the same
- Heavier
- Hard to tell

Question 2: What's Most Present

"What's showing up most right now?"

- Guilt about rest
- Fear of falling behind
- Numbness
- Overwhelm

Question 3: What Would Help

"What sounds most helpful today?"

- Talk it through
- Quick reset
- Gentle structure (to-do)
- Let something out (journal/letters)

What the Check-In Does:

- Updates dashboard priorities
- Suggests specific tool based on Q3 answer
- Tracks pattern over time (optional for paid users)
- Does NOT change core profile - that stays stable

Dashboard Differences

First-Time User Dashboard

Welcome to your space.

Based on your profile, here's what we recommend today:

-  Start a conversation - Let's unpack what's going on
- OR
-  Try this reset: "You Don't Need to Earn Rest"

Your tools:

- Soft To-Do List
- Journal Space
- Unsent Letters
- Resets Library

Returning User Dashboard

Welcome back, [Name].

What do you need today?

Quick Actions:

- [Start a conversation]
- [Quick reset]
- [Take a check-in]

Active Widgets:

- Your To-Do List (with current items)
- Recent Conversations (with dates)
- Check-in widget showing last check-in date

Top Navigation Updates

When Not Signed In:

[Logo: Unfinished, After Hours] [About] [Browse] [Sign In]

When Signed In:

[Logo: Unfinished, After Hours] [Dashboard] [Account] [Sign Out]

Homepage Hero Section

Not Signed In:

You're not lazy. You're exhausted.

Unfinished, After Hours helps you untangle burnout without turning rest into another task.

[Sign up - it's free] [Browse without an account]

Signed In:

Welcome back, [Name].

What do you need today?

[Start a conversation] [Quick reset] [Check in]

Conversation Feature Integration with Auth

Without Account (From Homepage)

User clicks "I want to talk this through"

↓

Prompt: "To save our conversation, please sign in"

[Sign in] [Continue as guest - won't be saved]

With Account

User clicks "I want to talk this through"

↓

Opens conversation immediately

↓

Auto-saves to "Past Conversations"

↓

Can resume anytime

Smart Routing Based on Quiz Answers

After Onboarding Quiz (Q5: Intent)

Dashboard highlights different features based on answer:

- "To feel less alone" → Highlights "Have a Conversation"
- "To get unstuck" → Highlights "Soft To-Do List"
- "To rest without guilt" → Highlights "Resets"
- "To quietly let things out" → Highlights "Unsent Letters"

After Check-In Quiz (Q3: What Would Help)

Immediately routes user to requested tool:

- "Talk it through" → Opens conversation feature
- "Quick reset" → Shows reset picker
- "Gentle structure" → Opens to-do list
- "Let something out" → Choice: Journal or Unsent Letters

Check-In Insights (Paid Feature)

Free Tier:

- Can take check-in quiz anytime
- Sees immediate recommendations
- No historical tracking

Paid Tier:

- Full check-in history
- Pattern visualization (simple, not overwhelming)
- Gentle observations like: "You tend to feel heavier on Mondays"
- Progress tracking: "Guilt about rest has decreased since you started"

Example Timeline Visualization:

Your Check-In Timeline

Week 1: Heavier •

Week 2: About the same •

Week 3: Lighter •

Week 4: About the same •

Most common: "Guilt about rest" → decreasing

Most helpful: "Talk it through" → consistent choice

IMPORTANT: This is NOT gamified. No streaks. Just gentle observation.

Updated Complete Site Map

Public Pages (No Login Required)

- Browse Sample Resets
- Sign In / Sign Up

Authentication Flow

Sign Up:

- → Onboarding Quiz (5 questions, required)
- → Dashboard (first-time)

Sign In:

- → Dashboard (returning)

Authenticated Pages (Login Required)

- Dashboard
 - - Quick actions
 - - Check-In Quiz widget
 - - Recent conversations
 - - Current to-do list
- Have a Conversation
- Resets Library
- Soft To-Do List
- Journal Space
- Unsent Letters
- Past Conversations
- Check-In Quiz (standalone page)
- Account Settings
 - - Profile & Theme
 - - Your Burnout Profile
 - - Retake Onboarding Quiz (resets profile)
- Upgrade (if free user)

Updated Monetization with Check-Ins

Free Tier (With Account)

- Onboarding quiz (creates profile)
- 3 check-ins per month
- 3 conversations per month (15 min each)
- 3 resets per day
- Basic soft to-do (5 tasks/day)
- 1 journal prompt per day
- Unlimited unsent letters (no export)

Paid Tier (\$5/month or \$45/year)

- Unlimited check-ins
- Check-in timeline & insights
- Unlimited conversations + full history
- Unlimited resets + full audio library
- Advanced soft to-do (unlimited tasks)
- Full journaling vault
- Export all content as PDF
- All theme packs included
- Early access to new features

Sign Out Experience

Sign Out Confirmation Dialog

Sign out?

Your conversations and work will be here when you return.

[Stay signed in] [Sign out]

This reassures users their data is saved and reduces anxiety about signing out.

Key Benefits of This Authentication Approach

1. Data Persistence

- Onboarding quiz creates stable profile
- Check-in quiz tracks change over time
- Users can see their patterns (if they want)

2. Appropriate Depth

- New users: Full onboarding (necessary context)
- Returning users: Quick check-in (low friction)

3. Personalization That Evolves

- Theme stays consistent (from onboarding)
- Recommendations adapt (from check-ins)

4. Low Pressure

- Check-in quiz is optional
- No nagging ("You haven't checked in in 7 days!")
- Dashboard shows last check-in, user decides when to do another

5. Value Demonstration

- Free users see benefit of account (saved preferences)
- Natural upgrade path when they want more features
- Saved conversations make the platform feel like "theirs"

Updated Prototype Requirements for Class

Add to Your Demo:

1. Sign Up Flow Mockup

- Simple sign-up form
- Onboarding quiz (show 2-3 questions)
- First-time dashboard

2. Dashboard for Returning User

- Shows check-in quiz widget
- Recent conversations section
- Saved to-do items
- Quick action buttons

3. Check-In Quiz Flow

- 3 questions
- Immediate recommendation
- Return to dashboard with updated suggestions

Key Points to Emphasize in Presentation:

Problem: Most apps make you set up complex profiles or retake assessments constantly

Solution: One deep onboarding quiz creates your space, optional quick check-ins adapt it over time

Innovation: Two-tier quiz system that respects user energy levels while providing personalization

Why This Structure Works:

- Clearer purpose for each quiz (Onboarding = who you are / Check-in = how you're doing today)
- Lower friction for returning users (don't retake full quiz)
- Data that actually helps (profile stays stable, check-ins track change)
- Natural upgrade path (free users hit conversation/check-in limits)
- Saved state feels valuable (conversations persist, preferences saved)

Testing & Beta Access Strategy

Overview

To gather quality feedback and validate features before full launch, Unfinished, After Hours uses a two-part testing access system: Invite Codes for controlled access, Feedback-for-Access to incentivize quality input.

System 1: Invite Codes

Purpose

Controlled rollout to specific groups (classmates, friends, early supporters) with trackable, customizable access.

How It Works

Code Entry Interface:

During signup or in Account Settings, users see:

Have an invite code? [text field] [Activate Free Access button]

Code Types & Uses

Unlimited Duration Codes:

- BETA_FOREVER - Permanent access for core testers
- FOUNDING_MEMBER - Special status for earliest supporters
- Use case: Close friends, key advisors, thesis committee

Time-Limited Codes:

- CLASS_3MONTHS - 3 months access for classmates
- SPRING_BETA - Access through end of semester
- FRIEND_6MONTHS - 6 months for friend referrals
- Use case: Class testing, seasonal cohorts

One-Time Use Codes:

- ALICIA_FRIEND_01, ALICIA_FRIEND_02, etc.
- Personalized codes for specific individuals
- Use case: Personal invitations, VIP access

Multi-Use Codes:

- STUDENT_BETA (50 redemptions max)
- WORKER_TEST (30 redemptions max)
- Use case: Sharing in group chats, testing cohorts

Code Redemption Flow

52. User creates free account
53. Enters invite code in settings or during signup
54. System validates code (checks expiration, usage limits)
55. Account upgraded to appropriate access level
56. Confirmation message shown with expiration date

Tracking & Analytics

Track for each code:

- Total redemptions
- Active users from this code
- Conversion rate (who upgrades to paid after code expires)
- Usage patterns (which features they use most)
- Feedback submission rate

Benefits

- Easy to share with classmates or specific groups
- Different durations for different testing needs
- Trackable analytics per code
- Creates sense of exclusivity
- Can convert testers to paid users with data on usage

System 2: Feedback-for-Access Program

Purpose

Incentivize quality feedback by rewarding users with extended access for meaningful contributions.

Feedback Types & Rewards

1. Feedback Survey (3 months free)

- Trigger: After 1 week of use
- Length: 5-7 questions
- Questions cover: feature usefulness, tone, missing features, pain points
- Auto-grants 3 months upon submission

2. User Interview (6 months free)

- Format: 15-minute Zoom/phone call
- Topics: Deep dive into experience, burnout context, feature usage
- Scheduled through Calendly link
- Access granted after interview completion

3. Bug Report (1 month free)

- Must be verified/reproducible bug
- Submit via in-app form or email
- Includes: what happened, expected behavior, screenshots
- Access granted after verification

4. Feature Idea (2 weeks free)

- Thoughtful feature suggestion with use case
- Minimum 2-3 sentences explaining why it would help
- Submit via feedback form
- Access granted for any substantive suggestion

Feedback Survey Questions (Example)

57. Which feature has been most helpful? (Conversation / Resets / To-Do / Journal / Letters)
58. Does the tone feel validating or patronizing? (Scale + open comment)
59. What feels missing or incomplete?
60. Would you recommend this to a friend experiencing burnout? Why or why not?
61. What almost stopped you from trying this platform?
62. One thing that surprised you (good or bad)?
63. If you could change one thing, what would it be?

Implementation Details

- Credits stack: Survey (3mo) + Interview (6mo) = 9 months total
- No limit on bug reports (encourage quality testing)
- Feature ideas can be submitted monthly
- All extensions show in Account Settings with expiration dates

Benefits

- Filters for engaged users who care about the product
- Gets actionable, quality feedback
- Clear value exchange (time for access)
- Builds relationship with early users
- Creates feedback loop for continuous improvement

Combined Testing Strategy

How Both Systems Work Together

Phase 1: Initial Access (Invite Codes)

- Recruit first 20-50 testers with invite codes
- Use CLASS_3MONTHS for classmates
- Use personalized codes for close friends/advisors
- Track which codes drive most engaged users

Phase 2: Depth & Quality (Feedback-for-Access)

- After 1 week, prompt for feedback survey
- Testers who engage earn extended access
- Schedule user interviews with most active users
- Bug reports help improve platform quality

User Journey Example

64. Sarah receives CLASS_3MONTHS code from Alicia - Signs up (3 months free)
65. Uses platform for 1 week - Completes feedback survey (+3 months = 6 months total)
66. Schedules user interview - Completes interview (+6 months = 12 months total)
67. Reports a bug about journal prompts - Verified (+1 month = 10 months total)
68. Submits thoughtful feature idea - Approved (+2 weeks total)

Testing Goals & Metrics

What to Track

Quantitative Metrics:

- Feature usage frequency (which features get used most)
- Session duration and return rate
- Conversation length and completion rate
- Check-in quiz completion vs. onboarding quiz
- Tool routing success (do conversations lead to tool use?)
- Invite code redemption rates
- Feedback submission rates

Qualitative Feedback:

- Survey responses (tone, usefulness, missing features)
- User interview insights
- Bug reports and pain points
- Feature requests and suggestions
- Testimonials and success stories

Key Questions to Answer

- 69. Does the conversation feature actually help people process burnout?
- 70. Is the 5-question onboarding quiz too long or just right?
- 71. Do tools feel connected (conversation to reset to journal) or isolated?
- 72. Does the tone work (validating vs. patronizing)?
- 73. What features do people wish existed?
- 74. Would users pay \$5/month after free access expires?
- 75. Which user acquisition channel works best (invite codes vs. referrals)?

Success Metrics

Beta testing is successful if:

- 70%+ of testers use platform more than once
- 50%+ complete feedback survey
- 30%+ refer at least one friend
- Average session time greater than 5 minutes
- Have a Conversation used by 60%+ of testers
- Overall sentiment: 80%+ positive feedback
- 20%+ indicate willingness to pay after trial

Tester Communication Templates

Welcome Email (After Signup)

Subject: Welcome to Unfinished, After Hours (Beta)

Hi [Name],

Welcome to Unfinished, After Hours!

You are one of our early testers, which means:

- Full access to all features (no limits)
- Your feedback shapes what we build
- You are helping create something that actually helps people

No pressure, no timeline. Use it when you need it.

A few ways to help:

- Use it genuinely (when you feel stuck/burnt out)
- Share what works and what does not
- Invite friends who might benefit

Your access expires: [Date]

Want to extend it? Earn more time by sharing feedback or referring friends.

Thanks for being here early.

- Alicia

Recruitment Message for Classmates

Hey!

I am building a burnout support platform for my class project and need people to test it. It is called Unfinished, After Hours.

What it is:

- NOT another productivity app
- A space to process burnout without being told to optimize
- CBT-style conversations plus gentle tools

What I need:

- Use it when you feel stuck/burnt out (not homework, just real use)
- 5-min feedback survey after a week
- Be honest about what sucks

What you get:

- 3 months free access (normally \$5/month)
- Earn more free time by sharing feedback or inviting friends
- First to try something that might actually help

Use code: CLASS_3MONTHS

Go to: unfinishedafter.com

Thanks!
